

2 & 3-section reform ladders
with flared base

NEW!

KET2 & KET3

> 3 sections

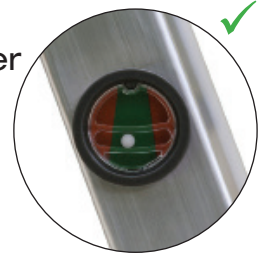

> 2 sections

► **Level compensation**

► **Secure!**

The ball level helps the user place the ladder at the correct inclination

► **Stable**

The flared base provides a greater stability on irregular grounds.

Visible upgrading thanks to the coloured profiles

2 & 3-section reform ladders with flared base

KET2 & KET3

3 positions of use

as leaning ladder,
as stepladder,
in a staircase.

The upper section of the 3 sections can be taken down to be used as a single ladder (except 3x11 & 3x12).

Stable

Its design with **flared base** absorbs the unevenness of the ground and helps to avoid obstacles.

Non-slip socks, anti-skid.

Secure

The ball level helps the user place the ladder at the correct inclination.

Large non-slip rungs, ribbed on 4 sides.

Hinges in reinforced steel which make the level compensation possible and provide more durability.

Steel strengthening pieces placed in the flared base's rungs.

Safety hooks in cast aluminium with locking device.

✓ OK

✗ NO
